Jio Platforms Limited

January 2024 -Present

Ghansoli, Mumbai

- Collaborated on building an Employee Performance management system .
- Performing manual testing on Jio Operating System .

Full-Stack Developer

Edify Accelerators

June 2020 - April 2021(9 months)

Bangalore(Remote)

- Collaborated on designing and developing of the chat-bot, the creation of its architecture, UI/UX, and back-end functionality . This approach led to a seamlessly interactive chat-bot experience, garnering a remarkable 30% increase in user engagement after the deployment of the chat-bot.
- Collaborating with cross-functional teams:Pushing the hard changes while every member being ready on the back-end to handle deployment issues .The successful teamwork achieved an impressive a notable 20% reduction in integration issues.

PROJECTS

Minimalist: A To-Do List application ([Source Code](#))

- Developed a minimalist, Notion-inspired to-do and note-taking app featuring seamless UI with auto-save functionality, enhancing user productivity and interaction. Implemented real-time updates for lists and todos, allowing users to create, edit, and rearrange tasks instantly without refresh or save actions.

A luxury Clothing Website: ([Live Link](#))

- Developed a dynamic luxury clothing website using React, showcasing a modern and opulent collection of high-end fashion. Implemented responsive UI components, seamless user navigation, and integrated secure payment gateways for an exceptional shopping experience.

Share-prompts: ([Live Link](#))

- Developed a Full Stack application in Next Js. This website has Google authentication and lets you share AI generated Prompts with other users on the platform using REST operations.Used Google console for API end points and security and MongoDB atlas for data base storage.
